This groundbreaking text continues to guide managers, executives, and business students with little experience in the field of finance. Finance for Non-Financial Managers, Seventh Edition, offers a practical introduction to financial decision making for students with no previous exposure to accounting or finance principles, or for those that want to broaden their understanding of financial analysis or upgrade old skills in the field of financial management and accounting. This seventh edition improves the clarity and conciseness of many finance techniques and the relationship between the various concepts covered in the book, enabling students to master the language and concepts of finance and accounting to assist them in future careers as managers or entrepreneurs. It also incorporates International Financial Reporting Standards (IFRS) as GAAP closes out in Canada.
